CTE STUDENT EARNINGS

Figure 10

Earnings Have Generally Improved for CTE and Non-CTE Students

Three Earnings Measures, CCC Students

Note: The CCC Chancellor's Office receives earnings data from the Employment Development Department on former CCC students employed in California, except those who are federal employees, military employees, or self-employed. The figure shows students by the year they last enrolled at CCC. "CTE students" refers to students who enrolled in at least one CTE course that year, while "Non-CTE students" refers to students who enrolled in at least one non-CTE course that year. The first chart reflects estimated median annual earnings for these students in the year after they last enrolled. The second chart reflects the percentage of these students who attained a living wage, based on comparing their earnings in the year after they last enrolled with certain estimated expenses for a single adult in their district's county. The third chart reflects the median percent change in earnings for these students from two quarters prior to the start of the academic year they first enrolled to two quarters after the end of the academic year they last enrolled.

CTE = career technical education.

A photograph of the College of the Canyons building, a modern structure with large glass windows and a curved facade. In the foreground, a banner commemorates the college's 45th anniversary, featuring a circular logo with the number 45 and the text '45 YEARS of Opportunities, Memories & Growth' and 'COLLEGE OF THE CANYONS 1969-2014'. The scene is set outdoors with a clear blue sky and some trees.
