Re: Continued SWP funding of \$112,500 for Job Developer/Placement Specialist positions for each college in the region

The SCCRC Strong Workforce Program (SWP) Steering Committee has agreed to continued funding for each college's Job Developer/Placement Specialist position every year with the following conditions:

1. The Job Developer/Placement Specialist positions will be funded "off the top" and not subject to the 17% performance-based incentive funds which may vary from year to year. We expect the 83% base funding to remain stable through the first 4-year cycle FY 2016/17 through FY2019/20.
2. The continued funding amount of \$112,500 will be reevaluated prior to the second 4-year funding cycle starting FY 2020/21.
3. Should the California budget become unstable with significant reductions to higher education, this continued funding will be re-evaluated by the Steering Committee members in place at the time.
4. This funding commitment **ONLY APPLIES TO THE** Job Developer/Placement Specialist funding at this time.

Best regards,
